U.S. DISTRICT COURT
MID. DIST. TENN.

Complaint

In June Core civic inc on harding Place came infected by the scabies, Due to the females being allowed into the facility where im being housed. Without Even sanitize theme or screening theme for scabies or anything the staff respond to codes to the females and return to the same units we are in. core civic inc allows females clothes to be washed with our and not using bleach or anything of that nature. I became infected with the scabies so bad on my hands they bleed from scracthing theme there blisters bettween my fingers it took over Two months to Get me medicine for the scabies it was 6 Pills they stated it was to Provent scabies but i already had theme, my question is if they Provent scabies why aint they offering it to the females when they first come in off the street. They came in the unit staff at Corecivic inc and advised Everyone to sign that we aint iching so they threaten inmates with going to the hole or loss of Good time. This is something this facility Could have Provented and this wouldn't have spread to the courts and staff or other inmates. This is a case of dilebertly indifference from medical and Corecivic inc. we were locked down for 3 days could call home for help we was not allowed to shower, staff did not check every inmate to see if they had the scabies

they tried to make it look good for the cameras
staff and Core Civic inc did not throw away all
clothes left us with the same ones. and for
this im asking relief from Core Civic inc et al
for the amount of \$750,000 for Punity, mental, Physical
emotional abuse. medical will not answer any of my
sick call i told all staff here im still itching
and i have not recieved any medical treatment
yet.
